

The Thing He Forgot.
The absent-minded German professor continues to contribute to the gaiety of the nation. Lately he had, late at night in his chamber, disrobed himself, when he sat down with his head in his hands.
"Donnerwetter!" he said. "There was something I was to do. What was it, now?"
He sat and pondered intensely for half an hour, growing colder and colder. Finally he sprang up.
"Ah, I have it!" he exclaimed. "I intended to go to bed!"

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

The Ciling of Machinery.

An investigator who likes to get down to fine points has been figuring out the difference in the ciling of watches and locomotives. A good watch needs oiling once in a year to a year and a half. A locomotive oiled in the same way should run sixty miles an hour day and night for 645 days, or nearly forty times the circumference of the earth. He says that as locomotives have to be oiled every day the watchmaker must have brought his art to a much higher degree of perfection than the man who has built the locomotive. As a matter of fact the cases are not parallel. The watch is most carefully protected from the air, dust and foreign substances. The locomotive runs through dirt, dust, cinders and debris of all sorts, much of which, as a matter of course, works into the machinery. If this man could keep a locomotive in a glass case and oil it and care for it as completely as he does his watch, he might be able to make some figures, but under the circumstances he can scarcely be said to have proven anything.

REPORT ON THE PENSIONS

Commissioner Evans Gives the Showing For the Year.

NO DIMINUTION IN NUMBER.

Nearly \$140,000,000 Was Paid Out During the Past Fiscal Term—The Roll Exhibits Losses of 41,122 and a Total of 54,072 Added—The Total Number of Pensions is 976,014, an Increase.

WASHINGTON, D. C. (Special).—The first annual report of Commissioner of Pensions H. Clay Evans to the Secretary of the Interior has been made public. He says: "There were added to the rolls during the year the names of 50,101 new pensioners,

COMMISSIONER OF PENSIONS EVANS.

and there were restored to the rolls 2971 pensioners, who had been previously dropped, a total of 54,072.

"During the same period the losses to the roll were 31,950 by death; 1074 by remarriage of widows and mothers; 1815 by legal limitation, (minors); 2683 for failure to claim pension for three years, and 3500 for other causes, an aggregate of 41,122. "The whole number of pensioners on the rolls June 30, 1897, was 976,014. The net gain over the previous year was \$336. It will thus be seen that the pension roll has not yet begun to show any diminution, though it has been anticipated by my predecessors in office that such would be the fact. Seven widows of Revolutionary soldiers and nine daughters of Revolutionary soldiers are still on the rolls. During the year 94,541 pension certificates were issued, of which number 50,101 were original allowances, and the balance were renewals, increases, restorations, renewals, etc.

"Of the number, 14,671 certificates of various classes were held in this bureau until July 1, 1897, and are accordingly not credited to the past fiscal year. "During the same period, 75,231 claims of various classes were disallowed. This number, however, does not include claims which were made for higher rates of pension. "The amount disbursed for pensions by the pension agents during the year was \$139,793,242.12, and the amount disbursed by Treasury settlement was \$159,473.23, a total of \$139,949,717.35."

TRAIN WREK UP AND BURNED.

Desperate Work of Four Robbers Near Albuquerque, New Mexico.

Atlantic and Pacific passenger train No. 2, from the West, was held up by four men near Grant's station, ninety-five miles west of Albuquerque, New Mexico, at 7.30 p. m. After blowing open the express company's safe, the robbers wrecked the train, which caught fire, the express, baggage and smoking cars being destroyed.

It is not known whether they were successful in obtaining booty, but it is thought a large amount of money was carried by the train. The coaches were cut off and left at the stockyards. The rest of the train was then taken out a mile and a half from the station, where the express safe was rifled. The engine and baggage car ran at a terrific rate until they struck the coaches, which were standing near the stockyards. The cars were wrecked and caught fire. The passengers had all left the coaches before the collision and none was injured. Fireman Henry Able, who was compelled by the robbers to run the engine when the coaches were left, was killed by the explosion when the safe was blown open.

NINETEEN MEN DROWNED.

The Steamer Idaho Founders in a Gale on Lake Erie.

The steamer Idaho, caught in the fierce southwest which swept over Lake Erie, foundered in eight fathoms of water, twelve miles above Long Point, which juts into Lake Erie from the Canadian shore, sixty-five miles west of Buffalo. Of her crew of twenty-one men two were saved. Eight hours after the disaster the steamer Mariposa sighted the single spar which marked the grave of the Idaho. Clinging to that spar, hardly out of the reach of the fierce sea, were the two survivors of the wreck, almost frozen from the long exposure in their wet garments. One of them had been made insane temporarily by his sufferings. It was no light task to rescue them from the spar. The Captain of the Mariposa ordered his small boats down, but they could not live in the sea. They tried throwing lines to the men, but the men were too stiff and cold to hold onto them. After two hours' manuevering he worked the Mariposa around to the spar and dragged the sailors aboard. The rescued men were William Gill, a deck hand, whose home is in Rochester, and Louis La Force, Jr., the second mate.

Killed His Son and Himself.

LIKE A WESTERN LYNCHING.

Mark Twain Describes the Austrian Reichsrath's Sitting.

The last all-night sitting of the Austrian Reichsrath in Vienna was the most disorderly ever witnessed in any Parliament. Some of the anti-Semitic expressions were of such an improper character as to defy reproduction. The most frequent insult dandled about was the charge of drunkenness. Three-fourths of the members appeared to have gone raving mad. "Liar," "Disgraceful scamp," "Drunkard clown," "Ginshop hog" and similar villainous epithets and suggestions were common remarks. Herr Wolff called Dr. Lueger (Burgomaster of Vienna) "The Vienna Thimble-rigger."

M. Verestehagin, the Russian painter, and Samuel L. Clemens (Mark Twain) were in the visitors' gallery. The former made sketches of various scenes and said he regarded them as substitutes for street fighting and the "sides of former days. Mark Twain said it reminded him of an American lynching meeting to punish a horse stealer," adding, "I suppose somebody had been hanged, but I was not there long enough to make sure of it." He asked Herr Lueger to give notice of his next twelve hours' speech, and said he would be there and sit it out. Herr Lueger took the observation seriously and replied that he hoped not to have to repeat the performance and, perhaps, improve upon it.
